PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building scalable backend and full-stack applications using Java, Spring Boot, React, REST APIs, and SQL. Experienced in developing LLM and RAG solutions using embeddings and vector databases, with a track record of optimizing application performance, automating operational workflows, and delivering enterprise software at Oracle, Amdocs, and ISN.

EDUCATION

University of North Texas

Master of Science, *Computer Science*

Aug 2025 - May 2027

GPA: 4.0/4.0

National Institute of Technology Warangal (NITW)

Bachelor of Technology, *Computer Science*

Jul 2018 - May 2022

GPA: 3.8/4.0

SKILLS

PROGRAMMING LANGUAGES: Java, Python, JavaScript, SQL

Development: Spring Boot, ASP.NET Core, FastAPI, REST APIs, Microservices, React, HTML, CSS, Jira, Postman, Junit, Splunk, Object-Oriented Programming, Data Structures, Algorithms

AI & DATABASES: LLMs, RAG, Embeddings, Vector Databases, PostgreSQL, MySQL

CLOUD & DEVOPS: AWS, Docker, Kubernetes, OpenShift, Jenkins, CI/CD, Git

WORK EXPERIENCE

ISN | Software Developer Intern | Dallas, Texas

Jun 2026 - Aug 2026

- Owned the end-to-end development of a self-service platform using React and ASP.NET Core REST APIs, enabling business users to resolve data mismatches without developer assistance and reducing turnaround time from **3–5 days to minutes for a process used approximately 600 times annually**.
- Developed an **LLM-powered bug-resolution agent** that analyzes bug reports and logs, retrieves relevant source code, and generates patches and regression tests for developer review.

Oracle | Software Engineer

Oct 2024 - Aug 2025

- Built a **RAG-based setup assistant for Oracle Fusion Functional Setup Manager (FSM)** by ingesting and chunking product documentation and task metadata, generating embeddings, and indexing content in a vector database to provide grounded responses to setup and troubleshooting questions
- Contributed to the modernization of **legacy Oracle Fusion FSM experiences** by migrating functionality to modular Oracle JET and Knockout.js components, improving maintainability and enabling reusable UI patterns.
- Developed **15+ UI interfaces and task flows**, including faceted search and responsive components, using Oracle JET, Knockout.js, JavaScript, and REST APIs.
- Improved **page response time by ~40%** and reduced **SQL query execution time by ~30%** through SQL optimization, service-level caching, elimination of redundant API calls, and frontend performance tuning.

Amdocs | Software Developer

Jul 2022 - Oct 2024

- Built **Java and Spring Boot services** integrating Digital One with Order Management systems, transforming product orders into UPC requests and improving order-processing efficiency by **~35%**.
- Developed **Kafka-based asynchronous processing and automated retry workflows** for order failures, enabling resilient message processing and reducing manual intervention by **~30%**.
- Built a **React and Spring Boot fallout-management application** that tracked failed orders across processing stages, surfaced error details, and enabled support teams to retry eligible transactions, reducing support response time by **~40%**.

PROJECTS

RAG Query Router | Python, FastAPI, SQLite, BM25, Docker

- Built a contract Q&A router that scans every contract for counts, missing clauses, and dollar or date comparisons; delivered **21/24 complete benchmark answers vs. 0/24** for a top-k hybrid retrieval baseline on 200 synthetic contracts
- Achieved **1.0 ms median query latency** in the local benchmark using rule-based routing with no LLM API calls; added an optional schema-validated LLM planner for unusual phrasing.

Enterprise RAG Knowledge Platform | React, FastAPI, PostgreSQL/pgvector, Redis, Docker

- Built a team PDF Q&A platform with background processing and vector search, giving users answers with page citations they can inspect against the original documents.
- Secured workspace-scoped retrieval with role-based access, JWT sessions, CSRF protection, and Argon2 hashing; returned a refusal when no relevant passage was found or the model cited an invalid source.

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Certified: Azure AI Fundamentals (AI-900)
- AWS Certified Developer - Associate
